SOFTWARE SOLUTIONS TO IMPROVE OPERATIONS

Today's business software solutions are diverse and complex, with wide-ranging features and capabilities. Are you looking for an on-premise, hosted or perhaps Software as a Service (SaaS) solution? Navigating the many different features and capabilities can be difficult. Our team takes time to understand your business's unique situation and offer the best software solution to meet your needs.

BENEFITS

Our software specialists understand the unique needs of each industry and can provide you with a trusted solution to improve your business operations. Our team can help you select the right software solution and implement features to help your business operate at maximum efficiency.

Improve Efficiencies

Warren Averett Technology Group knows how valuable efficiency is to any business or organization. Our team provides a variety of business software platforms that can help maximize the efficiency of your business through improved processes, workflows, checklists and more. We are dedicated to finding the solution that works best for you. We tailor our approach to meet your needs and boost your productivity by streamlining your administrative operations and providing automation services, database solutions, payroll services and more. We also offer monitoring systems that allow you to analyze every aspect of your business, so that you can pinpoint ways to further streamline your day-to-day tasks and ensure business continuity.

Gain Insight

Warren Averett Technology Group can help you select and implement business software solutions that give shareholders and decision-makers reliable and accurate insights into performance, shortcomings and opportunities for growth within your organization. Our software solutions position you to be efficient, flexible and responsive to clients, employees, vendors and owners. You can gain access to relevant and timely financial and managerial information such as, business analytics and dashboards, financial data, cash flow and custom EBITDA (earnings before interest, tax and depreciation and amortization). If you need insights to make important decisions in your business, our team can help analyze data and turn raw information into actionable plans.

Access Reports and Dashboards

Customizable dashboards and reports will give you perspective into your product lines, departments, warehouses, companies, locations, divisions and more. Warren Averett Technology Group designs the workflow of business accounting systems so you can get the insight you need into your multi-faceted business. We can help you implement software solutions that will allow you to easily manage your inventory and supply chain, improve performance, manage labor costs and speed up your processes. Our team has extensive experience in developing

and honing best practices that streamline business processes and workflow, maximize inventory and purchasing processes, improve customer service and increase your financial success.

BUSINESS SOFTWARE

We offer a variety of business software platforms to meet your needs.

Accounting Software

- Microsoft Dynamics GP
- Microsoft Business Central
- Sage 100
- FAS
- QuickBooks Enterprise

Office 365 Suite

- Microsoft SharePoint
- Microsoft Dynamics CRM
- Microsoft Office 365

OUR PROCESS

First, we ask lots of questions so that we can get to know your business and understand the challenges from your perspective. Together we strategize how our industry tested solutions can optimize your operations.

Next, we will help you demo products. It is virtually impossible to clearly compare alternatives without a robust, rigorous and well-documented selection process. We perform carefully planned demonstrations, which are controlled so software can be effectively compared and ranked by your in-house selection team.

Lastly, we can help you weigh the costs and the benefits. Software and hardware costs, implementation and training costs, as well as ongoing maintenance and support costs, must all be included in an intensive cost-and-benefit analysis. We analyze the software's code, design, technology and development sophistication to help you select the solution that best fits your business's needs.
