---

Scott Vance joined Warren Averett in 2015 and is the Director of Security Management for Warren Averett Technology Group. He oversees the Security Management Division, where his responsibilities are multifaceted and include conducting security assessments, offering security consulting services, performing penetration testing, assessing web applications and executing vulnerability scanning. Scott plays a pivotal role in guiding Warren Averett Technology Group's consultants on security-related aspects of information technology, emphasizing best practices and network architecture. Bringing a rich background to the role, Scott's prior experience encompasses 20 years in the United States Air Force, where he specialized in areas like IT security, networking, cryptography and mainframe services. Following his military career, Scott further expanded his expertise by working as a senior security consultant for a diverse range of commercial and government agencies over a period of eight years. Scott currently lives in Auburn, Alabama, where he enjoys family life with his wife and daughter.
